

Student Teacher / Casual User

NAME

Olivia Kelly

MARKET SIZE

TYPE

Young Student
Teacher

Quote

“There are changes coming to the teaching discipline, and I want to be there to experience it.”

Background

Olivia is an up and coming teacher: having dreamt of becoming a teacher since she was a teenager, she is excited that she is on her way to fulfil her dream. She began studying mathematics two years ago because she needs a bachelor's degree to make herself more marketable in becoming a teacher. She is smart and dedicated to her future career and so wants to improve herself with new knowledge in the teaching field.

Olivia is single and lives alone in the city, renting a flat.

Demographic

Female 23 years

Melbourne, Australia

Single

Student Studying to become a
Math Teacher

Goals

- Wants to learn and experiment with new technologies to improve her skill set
- To spend her time more efficiently when she is working, she has a lot of school work to get through so her personal projects should not take a long time to complete.

Motivations

- Olivia wants to learn and compare the methods of creating existing learning units.
- Olivia wants to see how she can create a better courses using Creative Learning Unit Frame Work.
- Olivia hopes to demonstrate her knowledge and teaching ability to possible employers by developing her skills in innovative methods and technologies.

Frustrations

- Olivia just started teaching and is not sure on how to create well designed courses for her students to learn
- Olivia has to juggle her work at university with her personal projects
- Olivia feels that some of the current methods of teaching and constructing learning units are archaic.
